

Elements are highlighted in lavender

Attributes are highlighted in mint

Values are highlighted in lemon

“Ref:” after an element indicates another element or list of elements that may exist within the first element.

Root element: document

- **CCPheader** This element contains metadata including (but not limited to) author, date, title provided either by document or encoder if no title exists, and CCP exhibit in which the original document was featured.
 - **ref:** model.mixed_content
- **Body** This contains the text of the original document.
 - **Ref:** model.mixed_content / list / title / name / p / pb / front / back / facsimile / location / measurement / quantity / timer / unclear
- **Model.mixed_content** This contains a number of formatting elements useful in many different places, enclosed in a “oneOrMore/choice” structure so that they may be individually ignored, repeated or used in any order.
 - **ref:** abbr /author / emph / hi / foreign / date / list / title / exhibit

Formatting-Related Elements

- **front** This contains any preface or introduction material from the original document.
- **caption** if the original document has a relevant caption, it goes here. This is listed in the CCP header.
- **title** If a title is given on the original document, it is recorded here; if there is no title given, a descriptive title may be added by the encoder. May be used in header or body.
- **subheading**
- **p**
 - **ref:** model.mixed_content / name
- **emph** use in case of emphasis in text
- **hi** use in case of capitalization, underlining, or other distinguishing features that do seem intended to create emphasis
- **pb** page break
 - Attribute: **given.page.number**
 - Attribute: **page.header**
- **back** contains any footnotes, epilogue, or other closing material from the original document
 - **ref:** note
- **note** for footnotes. Goes in <back/>

Content-Related Elements

- **abbr** abbreviation
 - Attribute: **full**

- **author** used primarily in header but may be used in body if original document lists an author
 - **ref:** name
- **Date**
 - Attribute: **when**
- **exhibit** used only in header to indicate which CCP exhibit original document was from
- **facsimile** link images of original document here, if needed
- **Foreign** for languages other than the document's primary language
 - Attribute: **lang**
 - Values: **en** / **fr** / **la** / **es** / **unknown**
- **item**
 - Attribute: **n** (data: **non-negative integer**)
- **list** (ref: item)
- **location**
 - Attribute: **type**
 - Values: **state** / **city** / **address**
- **measurement**
 - Attribute: **units**
 - Values: **enough** / **pint** / **gallon** / **lbs** / **dos** / **ounces** / **little** / **quart** / **tablespoon** / **teaspoon** / **teacup** / **gill** / **bits**
- **name** because our corpus deals with people who were in some cases forced to take enslaved names but may have chosen their own names at other times, we have added attributes to distinguish different types of names and a target system so that we can link all of a person's names back to them.
 - Attribute: **type**
 - Values: **honorific** / **first name** / **surname** / **alias** / **enslaved name** / **chosen name**
 - Attribute: **target**
 - Attribute: **xml:id** (data: **ID**)
- **Orig** indicates original nonstandard spelling or phrase
- **Quantity** used for measurements in recipes
 - Attribute: **amount** (data: **decimal**)
- **timer** used for cooking instructions in recipes
 - Attribute: **minutes** (data: **positive integer**)
- **unclear** used in cases of obscured, smudged, or otherwise indecipherable text
